QUINTING

MANUFACTURE D'HORLOGERIE

THE FIRST AND UNIQUE TRANSPARENT WATCH IN THE WORLD

THE FIRST AND UNIQUE WATCH WITH SAPPHIRE MOVEMENT

**PRESENTS A LIMITED EDITION OF CR24H CHRONOGRAPHS
(CAR RACE 24 HOURS)**

CHRONOGRAPHS "CR24H" (CAR RACE 24 HOURS) LIMITED EDITION

Quinting, the Swiss watch manufacture, known worldwide by its unique invention, a completely transparent watch with sapphire movement, presents a limited edition of "CR24H" chronographs.

This watch collection is dedicated to the first national team of Switzerland that will take part in the most famous prize in automobile endurance races, the 24 Hours of Le Mans that will be held in June 2006. Three first chronographs of this series are individually numbered with the drivers' blood group.

**QUINTING:
A RELIABLE
100% TRANSPARENT
“WRIST-ENGINE”**

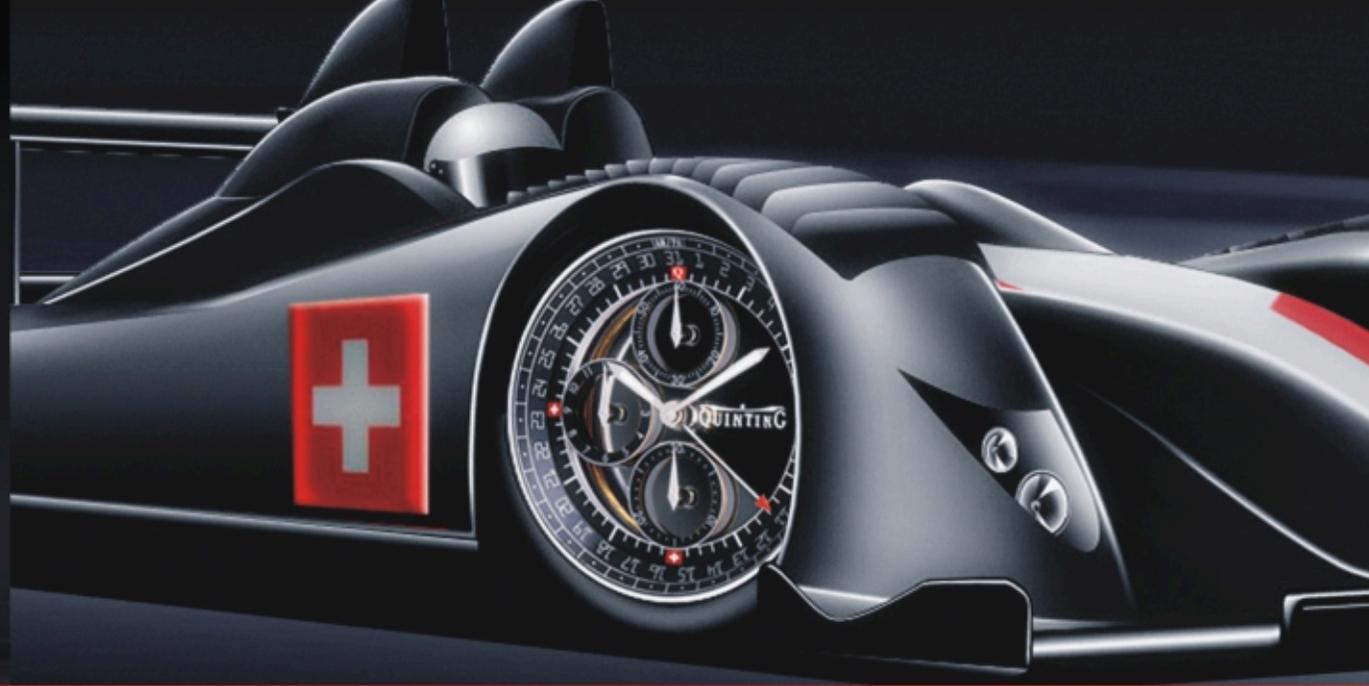

The engineers of Quinting, one of which comes from the automotive sector as well as the CEO of the company, Pascal Berclaz, like to take up the challenge. In 2000, after seven years of research and development they could realize a watch like no other, a completely transparent one, which is the challenge in the art of watchmaking. Today, this manufacture that has built its reputation on luxury and elegant haute couture watches of exceptional merit, proves that its watches are reliable even on the racing tracks and can withstand the stresses of extreme sports.

Unlike every form of racing where the duration of the race is measured in laps or miles, in the endurance car races such as the 24 Hours of Le Mans it is always based on time. This is one of things that separates endurance racing from other form of motor sports, and there is direct link to the importance of time and timing. An error in timekeeping has the potential to result in driver`s error. The race driver`s watch has to be rugged and durable enough to withstand the high speed pressure. The Quinting chronograph which is a true technical feat embodies these two defining characteristics.

CR24H, A DEDICATION TO THE CHALLENGING MEN

Driven by a love of cars and wheels, Quinting's engineers indulged their passion for extreme excitement, teaming up with the first national team that will represent Switzerland in the world's most famous sports car endurance race, the 24 Hours of Le Mans.

The sense of life of these "real men" in love with speed and sensitive to mechanical beauty is the challenge. They know that everything has been done but remain convinced that there is everything to do.

The Quinting's challenge is the first completely transparent watch in the world. The challenge of the Swiss national team consists in the fact that its drivers are the first to bring Switzerland to the most prestigious endurance race in the world.

COLLECTION OF CR24H CHRONOGRAPHS (CAR RACE 24 HOURS)

Dynamic look, large diameter of 43.8 mm, this model has been designed by Quinting to pay tribute to the first Swiss racing drivers who will compete in the 24 Hours of Le Mans car races. The collection is limited to 24 pieces in each style and available in 7 variations:

black dial and rose, white or yellow gold caseback,
white dial and rose, white or yellow gold caseback,
and chrome finish dial and white gold caseback.

All pieces in each style are individually numbered on the caseback and movement from one to twenty four. The dial echoes the type used for the dashboard counters of the Swiss racing car. Four white crosses on red background that replace numerals at 12h, 3h, 6h and 9h evoke the national flag of Switzerland.

CR24H
A LUXURY WATCH FOR REAL IRON MEN

Stylish. Elegant. Reliable. Quinting is a watch for all occasions: elegant at dinner, cool under stress, and able to take the shocks of racing cars during a chase. Fasten your belts and get ready to feel the extreme excitement with Quinting's 'Car Race 24 Hours'.
